Subject: Re: (092134937, WI No. 75, RPL No. 8227) Dumping of Concrete Debris into Passaic River Hotspot

Good Morning Rev. Algera,

Thank you for contacting the U. S. Environmental Protection Agency (EPA) to report the pushing of debris into the Passaic River (River). We at the EPA share your concerns to keep our rivers clean and greatly appreciate you reporting this and any future incidents that you or members of the Madison Ave. Church may observe.

Your e-mail below was forwarded to this Office last Wednesday (April 2) for response.

Concerning the dumping of debris from the Lagos Concrete & Masonry Company, the state government is usually the first responder to incidents such as you detailed in your e-mail. Toward this end, please call the New Jersey Department of Environmental Protection (NJDEP) hotline (1-877-927-6337) to report what you have observed.

Since the State is actively working to cleanup the River, they would appreciate receiving information on this incident. The NJDEP has ordered 66 responsible parties to assess and restore the River by damages caused by 18 contaminated facilities (sites). More information on this NJDEP directive can be obtained from their web page (http://www.nj.gov/dep/newsrel/releases/03_0131.htm)

EPA's efforts to remediate the River are discussed in EPA's web page ([http://www.epa.gov/Region2/passaic river/](http://www.epa.gov/Region2/passaic%20river/)). The goals of the EPA and five other federal and state agencies, including the NJDEP, who are working together are to remediate contaminated sediments, improve water quality, restore degraded shorelines, restore and create new Habitats and to enhance human use. For more information about actions already taken to cleanup the River, please go to <http://www.ourpassaic.org> or feel free to call Ms. Alice Yeh (212-637-4427, yeh.alice@epa.gov) .

In improving the health of the River, the EPA and the NJDEP encourage public participation in all phases of the project including the decision making process. For more information on this please contact Mr. David Kluesner (212-637-3653, kluesner.david@epa.gov)

Should you have any questions after contacting the NJDEP, Alice and /or David, please feel free to call on our toll -free line (1-888-283-7626).

Have a nice day,

George H. Zachos
Accelerated Cleanup and Stabilization Manager and Regional Public Liaison (formerly Ombudsman)

COMMENTS_OF_REQUESTOR

Passaic River.

I'm very concerned with the establishment of a concrete company right on the edge of the Passaic River and would like someone to investigate. They are pushing debris right into the river. Lagos Concrete & Masonry, On River St. and the corner of Arch St. There is actually an EPA sign across the street for some other work going on. Please respond to help us protect our river. Rev. Algera, cell: 973-342-7272
